

# Mission Critical IT Mission Proven Results

NJVC is the engine of the secure, integrated enterprise, delivering mission-proven, enterprise-class solutions to align and optimize IT in organizations around the globe. We make IT work for your mission, rather than make your mission work for IT.

## Enterprise IT Without Compromise

### **Meet the engine of the secure, integrated enterprise.**

At NJVC, we deliver IT automation, optimization, and cybersecurity in every project to make IT a tool for success, not a burden to be managed. Across customer enterprises, we unleash the power of IT without adding complexity in management.

NJVC delivers information technology and strategic solutions to our customers. Our niche is providing IT solutions for customers—intelligence, military, and federal agencies, and commercial entities—with industry-leading standards. For more than 15 years, we have made a name for ourselves as a trusted partner to our customers and have evolved into one of the largest IT contractors working with the Department of Defense.

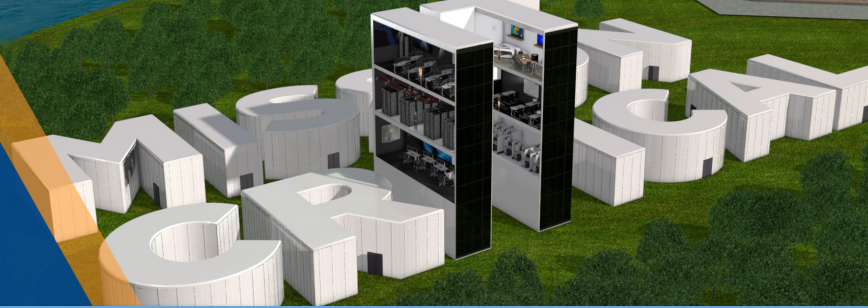

## Our Contract Vehicles

### **Trusted partner with technical proficiency.**

NJVC is proud to provide world-class professional IT services and support for federal customers through our contract vehicles.

- Army ACCENT BOA — NJVC is a proud awardee of the Army Cloud Computing Enterprise Transformation (ACCENT) Basic Ordering Agreement (BOA) contract. We provide DoD organizations commercial Cloud Service Offerings (CSO) and IT technical support to transition enterprise applications to a commercial cloud environment through this vehicle.
- GSA Alliant 2 GWAC — NJVC is a proud holder of GSA Alliant 2, providing federal agencies with integrated IT solutions for evolving needs on a global basis.
- GSA IT Schedule 70 — NJVC's IT products and support services are available through GSA IT Schedule 70. Schedule 70 is an IT procurement vehicle that offers a comprehensive array of state-of-the-art IT products, services, and solutions to federal agencies.

## Achieving Your Mission, Iteration by Iteration

**We don't write software for everyone.  
We write it for you.**

Software is more than just applications. Software is what turns IT capability into positive mission outcomes. We provide start-to-finish software solutions that will help you achieve your current goals and future missions.

We partner with national security agencies to determine exact needs and write custom-designed software that makes missions more achievable. We remain agile throughout solution delivery to continuously meet rapidly evolving requirements as environments and mission needs change. Line by line, from small iterative improvements to large mission tools, NJVC can design the perfect software to achieve your mission goals.

We then provide training to empower your enterprise. Our training packages include agile coaching, training, and consulting. We create custom software and training solutions to support the world's most important mission. Yours.

## Past Performance

### Proven results.

As Prime Contractor, NJVC provided all IT-related services for a major IC Agency's critical mission systems. Over the course of the contract, we supported a workforce of more than 40K users, consolidated 22 help desks and 36 physical networks, and migrated diverse IT Infrastructure capabilities into an Information Technology Infrastructure Library (ITIL) based service framework. We led our customer's move into the cloud and established the enterprise "as-a-service" model. NJVC applied SAFe® Lean-Agile methodology to application development and sustainment efforts, resulting in a single information source yielding a 33% reduction in significant changes and a 20% reduction in Discrepancy Reports.

NJVC used our Enterprise Management (EM) Services to enable cross-Enterprise situational awareness to ensure a near real-time, comprehensive, global, and fully integrated view of the operational health and integrity of the IT infrastructure. We utilized operational dashboards monitoring for more than 20K assets worldwide while maintaining essential day-to-day mission operations.

## OUR PARTNERS

NJVC believes in the power of innovation through collaboration.

## Commercial IT Solutions

### World-class solutions for hometown projects.

We leverage the technology that supports the world's most critical missions to protect and optimize commercial customers with secure requirements. We provide assessments across our range of products to help your organization optimize your IT.
