

NUTANIX IN 3 MINUTES

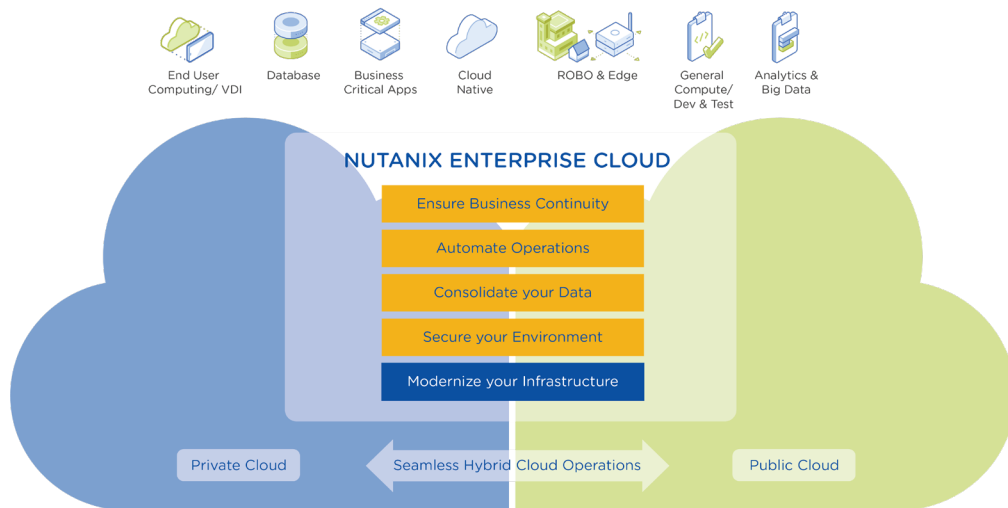

WHAT WE DO

Companies are digitizing at an ever increasing rate, pressuring IT organizations to produce innovative software experiences and data services that engage customers, improve productivity, and accelerate growth. Too often, however, IT is held back from delivering on these objectives because of the operational complexity endemic in legacy infrastructure.

Nutanix pioneered hyperconverged infrastructure to address these challenges, enabling IT leaders to re-architect and modernize their datacenters for the cloud era. Nutanix helps IT teams build and operate highly automated private and hybrid clouds. Our software simplifies infrastructure management, delivers powerful self-service capabilities, consolidates storage silos, and provides advanced IT operations, all with a lower TCO than legacy and public cloud alternatives, and no vendor lock-in.

The Nutanix Enterprise Cloud platform bridges private, public, and edge cloud operating environments, leveraging a single platform and management console that runs any application at any scale. Nutanix empowers you to build a hybrid cloud tailored to your business and application needs.

NUTANIX DELIVERS: ONE PLATFORM. ANY APP. ANY LOCATION

A NUTANIX ENTERPRISE CLOUD SOLUTION IS...

Easy: 1-click simplicity

Quickly and non-disruptively set up and manage your cloud from day 1, while delivering all critical applications, data, and services across private and hybrid clouds. One-click upgrades, maintenance, and scale, in the middle of the workday, with no downtime. Use freed up cycles to focus on higher value tasks.

Intelligent: optimized and secure platform for hybrid cloud

Built-in AI and adaptive machine learning ensure optimal application performance, data-driven resource planning, and automatic detection and resolution of slowdowns and security deviations. Build your cloud on your terms with automated and self-service operations.

Resilient: always-on performance

Self-healing architecture protects data and keeps your organization running, supported by automated replication as well as 1-click failover and disaster recovery. Certified to run even the most demanding enterprise applications and databases from SAP, Oracle, Microsoft, Splunk, IBM, Citrix, and many others.

WHAT DOES THE NUTANIX ENTERPRISE CLOUD PLATFORM INCLUDE?

Nutanix HCI combines compute, storage, virtualization, and networking in a single unit. As an entirely software-defined solution, you get to work with the hypervisor, public cloud, and server platform that meets your requirements, including appliances from HPE, Lenovo, Fujitsu, Inspur, Dell EMC, IBM, and Nutanix. Build the optimal environment for your workloads, whether it's virtualized applications, bare-metal services, or container-based applications.

ESSENTIAL ENTERPRISE AND CLOUD SERVICES

The Nutanix Enterprise Cloud platform provides a single management plane for vital cloud services and functionality, such as file, block, and object storage, microsegmentation, self-service, planning and chargeback, governance, and application lifecycle automation. Nutanix also offers SaaS services, including databases, desktops, cloud monitoring, disaster recovery, and IoT.

WHAT MAKES NUTANIX THE IDEAL ENTERPRISE CLOUD PLATFORM?

Nutanix gives you the simplicity, flexibility, and agility of public clouds with the security and control of on-premises infrastructure. Nutanix also provides true hybrid cloud capability, allowing cloud operators to extend, burst, or migrate applications across public and private clouds, without rearchitecting or retooling for each environment.

Accelerate time to value and increase ROI

Deploy a full-stack solution in hours, recovering your investment in as little as 9 months.¹

Improve productivity and quality

85% less downtime. IT can focus on driving operational excellence and creating new value for customers and the business.¹

Build your cloud on your terms

Choose the best cloud, hardware, and hypervisor for your business and applications.

Reduce IT risk and waste

Start small and grow as little as a node at a time—no more overprovisioning.

ALL TOGETHER NOW

Nutanix empowers IT to align with the business for faster innovation, exceptional customer experiences, and a competitive edge. Visit nutanix.com to learn how you can accelerate your cloud journey. While you're there, be sure to take a [free test drive](#) to experience Nutanix for yourself!
