The Workflow Challenge

Many enterprises have **few formal processes** for their complex work

- Spend hours each week in team meetings
- Search hundreds of e-mails in their inbox
- Track status across dozens of spreadsheets
- Send manual Word docs and PDF reports

The Workflow Challenge

Their missions **lack real-time visibility**
into the status of operations

- Need to track their work in a central location
- Need to improve efficiency and productivity
- Need to grow and scale operations
- But lack the time, budget or IT resources

The Workflow Challenge

Organizations need a flexible, yet powerful solution they can build and manage themselves

- Basic task apps are too limiting
- BPM solutions cost too much
- In-house IT takes too long
- Low-code still requires programming

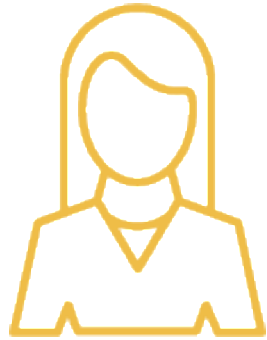

Introducing HighGear

The leading **No-Code Platform** for **business analysts** to rapidly **build enterprise-grade workflow applications**

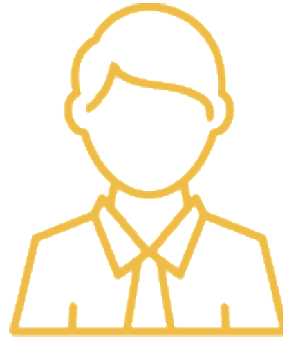

- **The 3 A's**
 - **Autonomy**
 - **Agility**
 - **Auditing**
- **Fast ROI, Continuous Improvement**

Driving Digital Transformation

Since 2009, **HighGear** improves enterprise-wide delivery of communication services, Media Group marketing, project management, and performance reporting. **HighGear** has provided 50% reduction in general administrative time and significant accuracy improvement for charge-out of project time.

Since 2013, **HighGear** streamlines retail store execution, workflows, tasks, store management activities and two-way communication between Community Services HQ and field locations CONUS & OCONUS.

Since 2016, **HighGear** automates quality audit management, surveillances, compliance, remediation activities, and performance reporting CONUS & OCONUS. Usage was recently expanded into OIG to support Audit & Investment Divisions activities.

Used by Leading Companies

Your Workflow Awaits.

Claims Management
Description: Manage the reimbursement for therapy and other services provided. Dynamic route records, apply escalation criteria, calculate completion metrics, and generate digital reports.
