

DEEA

DEVELOPMENT AND
ENHANCEMENTS FOR
ENTERPRISE APPLICATIONS

Development and Enhancements for Enterprise Applications (DEEA) supports the transition to the Intelligence Community Information Technology Environment (IC ITE), Joint Information Environment (JIE) and other Intelligence Community (IC) efforts, while improving mission capabilities, data migration, capacity planning, systems/infrastructure engineering, and agile development support for the IC ITE and IC.

Types of requirements that can be supported on this contract:

- Artificial Intelligence
- Data Science
- Research & Development
- Agile Development
- Software Engineering
- Business Analysis
- Cloud Migration
- Greenfield Development
- Workflow Automation
- Sustainment (O&M)
- Cybersecurity
- Intelligence Applications

Advantages

- ✓ No risk of acquisition delays or protests
- ✓ Four (4) years of runway remaining on contract
- ✓ Established processes for requirements
- ✓ Prototyping, development and sustainment all on one contract
- ✓ Highly qualified team, with security clearances, ready to support your requirements!
- ✓ 56,000 sq. ft. collaborative development facility, and 6,000sq. ft. SCIF development space

The process to bring your requirements to DEEA has been streamlined to ensure your operational requirements and needs are validated quickly, efficiently, and in concert with our Government leadership.

Identify your requirement and funding ➤ Contact TBG DEEA PMO ➤ Discuss requirement with DEEA GOV PM ➤ Meet with TBG Dev PM (COI-dependent) ➤ Receive ROM/LOE ➤ MIPR Funds

DEEA GOV PM Approval

DEEA

DEVELOPMENT AND
ENHANCEMENTS FOR
ENTERPRISE APPLICATIONS

We support the following Communities of Interest (COI) with their rapid prototyping, agile development, or advanced analytics and artificial intelligence requirements:

Operations

JIOC / Collections

Analysis &
Production (A&P)

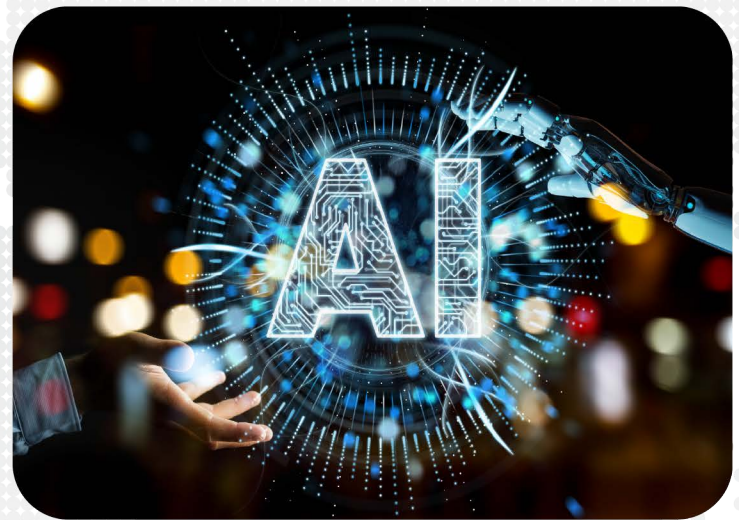

Business
Operations

Science &
Technology (S&T)

Chief Information
Officer

Artificial Intelligence. The DEEA development team offers significant expertise in Artificial Intelligence (AI) technologies, such as Machine Learning (ML), Natural Language Processing (NLP), Computer Vision (CV), Feature Extraction, Robotic Process Automation (RPA), and other Data Science tools that can advance your mission. Do you have a business or mission challenge that can be solved by AI? Contact us to talk about it! Our DEEA Team is an honest broker and trusted partner who will work with you to solve your most difficult problems using state-of-the-art technologies!

Rapid Proof-of-Concept Prototyping. Our DEEA developers can rapidly develop software prototypes to explore and demonstrate the feasibility of new application concepts. Pilot projects initiated under DEEA enable IC end-users to gain a clearer picture of technology capabilities, along with anticipated project costs, timelines, and risks. Let us help you solve your Big Data problem by working with you to develop a cutting edge proof-of-concept application!

Do you have a requirement that falls under one of the above Communities of Interest? If you're wondering how our Agile Development capabilities can enhance your mission, or how we are currently supporting the entire Defense Intelligence Enterprise, contact us at DEEA@thebuffalogroup.com or call at 571-612-4357
